

Keep the house well ventilated

Please allow time for the applications to dry for both pets and humans (1hr weather depending).

Increase of pest activity

Our treatment can drive pests out of harbourage areas and you will begin to see dead and dying pests.

Wait 3-4 weeks to see results

Some active ingredients are designed to be transferrable, so not a quick kill, instead allowing socialization and infection of pests.

Pest control is factor driven

External factors can draw new pests to your home after a treatment, so re-infestation is possible, with pest searching for food, shelter and climate.

Hold off mopping & cobweb removal

Wait at least 7 days before mopping or removing cobwebs with a broom / brush (not water) to assist in the effectiveness of the treatment.

Free Service Period

If you are experiencing on-going issues after the first month, please call us. We are here to help and will follow up at no charge.
